

# Aman Ullah

Full Stack Developer

Bahawalpur, Pakistan • +92309-4355791

[au958062@gmail.com](mailto:au958062@gmail.com) •

Personal Details:

10-03-2000 ■ Pakistani ■ Male

Experienced Full Stack developer adept at building robust digital solutions. With three years of hands-on experience in Web Development, I excel at crafting intuitive interfaces. My innovative approach to development consistently delivers impactful solutions. Eager to contribute to a dynamic team as a Full Stack developer, leveraging creativity to drive organizational goals.

## Selected Achievements

- Streamlined and enhanced user experiences on websites and apps, improving usability and engagement.
- Collaborated closely with leadership and product teams to establish efficient design workflows and deliver exceptional user experiences.
- Developed a 20-page website, elevating navigation and brand visibility.
- Played a pivotal role in ensuring cohesive user experiences across multiple touchpoints, enhancing overall digital interaction.

## Education and Credentials

Bachelor of Science (BS) in Software Engineering

**The Islamia University of Bahawalpur – Bahawalpur, Pakistan**

## Skills Highlights

- Full Stack Developer
- Backend Developer
- WordPress Developer
- MERN & MEAN Stack Developer
- PHP/Laravel
- ReactJS/VueJS/NextJS
- TypeScript
- JavaScript ES6
- Bootstrap 5
- Theme Development
- E-Commerce
- Elementor Pro
- Divi Theme Builder
- API's Implementation
- UI/UX Design
- DevOps

## Professional Experience

### Upwork Client – USA

02/2024 – Continued

#### ( Investor App Landing Page ) – MERN Stack

Designed a sleek and informative landing page for the Investor Web App developed with the MERN stack (MongoDB, Express, React, Node.js). The landing page effectively introduces the app's key features, including investment management, portfolio tracking, market trend analysis, job posting, Upwork story sharing, and event creation. Focused on showcasing the app's capabilities with a user-friendly design, compelling visuals, and clear call-to-actions to encourage user engagement and sign-ups.

- *Introduces the Investor Web App using the MERN stack.*
- *Highlights features: investment management, portfolio tracking, market trend analysis.*
- *Additional functionalities: job posting, Upwork story sharing (like Instagram), event creation.*
- *Sleek design with compelling visuals.*
- *Optimized for user engagement and responsiveness.*

### Upwork Client – USA

02/2024 – Continued

#### ( Investor App Web App ) – MERN Stack

Developed an Investor Web App using the MERN stack (MongoDB, Express, React, Node.js). This project included features for managing investments, tracking portfolios, and analyzing market trends. Additionally, it incorporated functionalities such as posting jobs, sharing Upwork stories similar to Instagram posts, and creating events. Focused on delivering a responsive and intuitive user interface, secure data handling, and real-time updates to enhance user engagement and investment decisions.

- *Developed with MongoDB, Express, React, and Node.js (MERN stack)*
- *Web app for investment management and portfolio tracking*
- *Market trend analysis*
- *Posting jobs and creating events*
- *Sharing Upwork stories similar to Instagram posts*
- *Responsive and intuitive user interface*
- *Secure data handling*
- *Real-time updates for enhanced user engagement and investment decisions*

### Upwork Client – Pakistan

01/2024 – 02/2024

#### ( Pricing Plan Landing Page ) – NextJS / Frontend

I developed a Pricing Plan Landing Page for an Upwork client using Next.js. This project involved creating a dynamic and responsive landing page that effectively showcases pricing options and encourages user engagement. Leveraging Next.js, I ensured fast performance and seamless navigation, enhancing the client's online presence and conversion rates. *Customization and Scalability.*

- *Developed using Nextjs*
- *Dynamic and responsive design*
- *Showcases pricing options effectively*
- *Optimized for fast performance and seamless navigation*
- *Improved client's online presence and conversion rates*

### Practice – Self

06/2023 – 07/2023

#### ( E-Commerce Project ) – MERN Stack

Developed a comprehensive E-Commerce platform using the MERN stack (MongoDB, Express, React, Node.js). This project focused on creating a dynamic and scalable online store with features such as product listings, user authentication, shopping cart functionality, and secure payment processing. Emphasized responsive design, seamless user experience, and optimized backend performance.

- *Developed with MongoDB, Express, React, and Node.js (MERN stack)*
- *Real-time messaging capabilities*
- *Responsive and user-friendly interface*
- *Product listings, user authentication, and shopping cart functionality*

**Upwork Client – Nigeria**  
**( Clikkle-Web-App / Admin-Panel ) – MERN Stack**

01/2023 – 03/2023

Developed the Clikkle-Web-App and Admin-Panel using the MERN stack (MongoDB, Express, React, Node.js). This project included creating a responsive web application and an intuitive admin panel for efficient content management. Focused on user-friendly design, secure data operations, and seamless functionality to support business operations.

- *Developed with MongoDB, Express, React, and Node.js (MERN stack)*
- *Real-time messaging capabilities*
- *Responsive and user-friendly interface*

**Fiver Client – India**  
**( Online Chat System ) – MERN Stack**

06/2022 – 07/2022

Developed a real-time Online Chat System using the MERN stack (MongoDB, Express, React, Node.js). This project involved creating a responsive and user-friendly interface for seamless communication. Focused on ensuring reliable message delivery, secure data handling, and optimal performance to enhance user interaction.

- *Developed with MongoDB, Express, React, and Node.js (MERN stack)*
- *Real-time messaging capabilities*
- *Responsive and user-friendly interface*
- *Reliable message delivery and secure data handling*
- *Optimized performance for enhanced user interaction*

**Fiver Client – India**  
**( Payment Method ) – MERN Stack**

05/2022 – 06/2022

Developed a robust Payment Method system using the MERN stack (MongoDB, Express, React, Node.js). Focused on creating a secure and efficient payment process, ensuring seamless integration with various payment gateways.

Emphasized responsive design, user-friendly interfaces, and optimized backend performance for reliable transactions.

- *Developed with MongoDB, Express, React, and Node.js (MERN stack)*
- *Secure and efficient payment processing*
- *Seamless integration with various payment gateways*
- *Responsive design and user-friendly interfaces*
- *Optimized backend performance for reliable transactions*

**Fiver Client – India**  
**( Payment Card Creation ) – React/Frontend**

04/2022 – 05/2022

Developed a responsive Payment Card Creation interface using React. Focused on intuitive design, seamless user experience, and secure data handling to facilitate easy and efficient payment card creation for users. Implemented best practices in frontend development to ensure high performance and usability.

- *Developed with React*
- *Responsive and intuitive design*
- *Seamless user experience*
- *Secure data handling*
- *High performance and usability*

**Local Project – Pakistan**  
**( Online Shop Store ) – PHP/Laravel**

12/2021 – 01/2022

I undertook the development of an Online Shop Store as a PHP/Laravel developer. This project aimed to provide a seamless e-commerce experience for users in Pakistan, leveraging the robust capabilities of PHP and Laravel framework.. I led the development efforts to build a fully functional e-commerce platform from scratch using PHP and Laravel. This involved creating user-friendly interfaces for browsing products, managing orders, and facilitating secure transactions.

- *Customization and Scalability*
- *Payment Integration*
- *Responsive Design*
- *Performance Optimization*.

## ( Advocate-Iron.com ) – MERN Stack Developer (Remote)

As a MERN Stack Developer for Advocate-Iron.com, I spearheaded the creation of robust web applications utilizing MongoDB, Express.js, React.js, and Node.js technologies. Leveraging these powerful tools, I crafted customized solutions tailored to enhance Advocate-Iron.com's digital presence.

- *Designing and developing scalable web applications to meet Advocate-Iron.com's unique business needs.*
- *Implementing user-centric designs to ensure seamless performance and optimal user experience.*
- *Collaborating remotely with the team to deliver timely updates and foster open communication.*
- *Employing best practices in code optimization and performance tuning to enhance website speed and reliability.*

## ( Tipanonymous.com ) – Full Stack Developer (Remote)

As a Remote Full Stack Developer for Tipanonymous.com, I led the development of a fully customized website consisting of 15 pages, utilizing React and Next.js for the front end. Employing React's component-based architecture and Next.js server-side rendering capabilities, I ensured optimal performance and seamless navigation.

On the back end, I implemented a robust server using Node.js, Express, and MongoDB for efficient data management. Through collaborative efforts and meticulous attention to detail, I delivered a comprehensive solution that enhances user engagement and accessibility for Tipanonymous.com.

- *User Experience (UX) Design*
- *Responsive Design*
- *Security Measures*
- *Content Management System (CMS)*
- *Analytics Integration*
- *Regular Maintenance*

## ( www.taireglement.fr ) – Laravel Developer ( Remote )

As a Laravel Developer for [www.taireglement.fr](http://www.taireglement.fr), I took charge of developing the admin dashboard and its entire backend infrastructure. Leveraging Laravel's robust framework, I meticulously crafted a user-friendly and efficient admin interface tailored to meet the specific needs of the platform.

- *My responsibilities included architecting the backend systems, implementing data management functionalities, and ensuring seamless integration with the front-end interface.*
- *By employing best practices in Laravel development, I created a scalable and secure backend environment capable of handling complex administrative tasks with ease.*
- *Furthermore, I incorporated features for user authentication, role-based access control, and data visualization, empowering administrators with the tools they need to manage the platform effectively.*

## ( Responsiveness Specialist ) - Front-end Developer (Remote)

As a Remote Front-end Developer specializing in Responsiveness, I led design efforts to optimize user experiences across websites and apps. Collaborating closely with the CEO and product team, I streamlined a complex 16-page website, enhancing brand visibility and user loyalty. My focus on crafting responsive designs ensured seamless interactions across various platforms, fostering heightened user satisfaction.

- *I spearheaded the creation of well-crafted digital designs to enable streamlined user experiences across multiple interaction points, enhancing overall user satisfaction*
- *Played a key role in enabling streamlined user experiences across various points of interaction aimed at enhancing user satisfaction through well-crafted digital designs.*

## Additional Experience

**Computer Science Teacher**, Science Academy – Bahawalpur, Pakistan | 2021 – 2022  
**Graphics Design internee ( Remote )**, Digital Business Xpert – Karachi, Pakistan| 2021  
**Web Animations**, GitHub Repository | 2019  
**Data Entry and Web Researcher**, Data Robos and Adroit Solutions USA – New York, USA | 2016 – 2018

## Professional Development

**WordPress**, Code's Thinker | 2022  
**Full Stack**, Code's Thinker | 2021  
**MERN Stack, MEAN Stack**, Code's Thinker | 2020  
**ReactJs, VueJs**, Code's Thinker | 2020  
**UI/UX Design Course**, Code's Thinker| 2020  
**Graphics Design Course**, KPITB | 2020  
**Logo Design Course**, Udemy | 2020  
**JavaScript Programming Course**, BitDegree | 2019  
**Cyber Security Course**, Udemy | 2019  
**Website Animations**, Online Tutorials | 2019  
**Introducing Coding for Beginners: an HTML and CSS Course**, BitDegree | 2018  
**Critical Thinking Course**, UrCours | 2018

## Projects

**Hostel Management System – Website Development (09/2024):** Using the MERN stack, we developed a Hostel Management System. With React, Vue.js, Node.js, and MongoDB, we created a seamless solution for hostel administration. This system offers intuitive interfaces, dynamic data management, and real-time communication, optimizing hostel operations efficiently.

**Portfolio Website – Website Development (09/2023):** Implemented web methodologies to transform a portfolio website, optimizing user engagement by leveraging intuitive layouts and compelling visuals. Enhanced aesthetics and functionality of a portfolio website through a comprehensive website development, resulting in an immersive and user-centric experience.

**UI/UX Designer, Portfolio Website – Website Development (09/2023):** Implemented UI/UX design methodologies to transform a portfolio website, optimizing user engagement by leveraging intuitive layouts and compelling visuals. Enhanced aesthetics and functionality of a portfolio website through a comprehensive UI/UX design, resulting in an immersive and user-centric experience.

**UI/UX Designer, Muttii Website – Website Development (08/2023):** Managed UI/UX initiatives for Muttii Groups spanning website, app, and tablet platforms, guaranteeing intuitive navigation and seamless user experiences. Developed innovative, user-centric designs to enhance visual appeal and functionality across diverse viewing platforms.

**Ecommerce Website - Website Development, Local University Project (02/2022):** I revolutionized an E-commerce website for our Local University Project. Through meticulous attention to detail and strategic layout planning, I transformed the platform into an immersive and user-centric shopping experience. I optimized user engagement and satisfaction. The result is a visually captivating and intuitively navigable E-commerce website that enhances the overall shopping journey for users.

**Restaurant Management System - Website Development, Local University Project (02/2022):** As developers, I crafted a robust Restaurant Management System (RMS) for our local university project. Leveraging the power of React, PHP, and MySQL, I offers a comprehensive solution for managing restaurant operations efficiently.

**UI/UX Designer, Wash House Website – Front End Development (09/2022):** Transformed laundry service's online presence, boosting customer acquisition through innovative web strategies, while refining front-end elements for enhanced digital branding and market positioning.

## Community Involvement

**Cyber Scout, Cyber Security of Pakistan (2021 – Present):** Facilitate comprehensive cybersecurity training sessions for staff and users, effectively enhancing organizational awareness and reducing human error risks.

**Rescue Scout, Punjab Emergency Service Rescue-1122 (2021 – member):** Collaborate with teams to develop proactive strategies for mitigating risks and safeguarding lives in diverse environments.

**Volunteer Creative Designer, Cyber Security of Pakistan (2021):** Crafted bespoke LinkedIn covers to foster a professional digital presence of initiative. Designed informative awareness posts to educate public about crucial security measures and threats.
