Personal Details:

10-03-2000 ■ Pakistani ■ Male

Experienced Full Stack developer adept at building robust digital solutions. With three years of hands-on experience in Web Development, I excel at crafting intuitive interfaces. My innovative approach to development consistently delivers impactful solutions. Eager to contribute to a dynamic team as a Full Stack developer, leveraging creativity to drive organizational goals.

## Selected Achievements

- Streamlined and enhanced user experiences on websites and apps, improving usability and engagement.
- Collaborated closely with leadership and product teams to establish efficient design workflows and deliver exceptional user experiences.
- Revamped a 20-page website, elevating navigation and brand visibility.
- Played a pivotal role in ensuring cohesive user experiences across multiple touchpoints, enhancing overall digital interaction.

## Education and Credentials

Bachelor of Science (BS) in Software Engineering

**The Islamia University of Bahawalpur – Bahawalpur, Pakistan**

## Skills Highlights

- Full Stack Developer
- Backend Developer
- WordPress Developer
- MERN & MEAN Stack Developer
- PHP/Laravel
- ReactJs/VueJS/NextJs
- TypeScript
- JavaScript ES6
- Bootstrap 5
- Theme Development
- E-Commerce
- Elementor Pro
- Divi Theme Builder
- API's Implementation
- UI/UX Design

## Professional Experience

**Local Project – Pakistan**

**02/2024 – 02/2024**

**( Online Shop Store ) – PHP/Laravel**

I undertook the development of an Online Shop Store as a PHP/Laravel developer. This project aimed to provide a seamless e-commerce experience for users in Pakistan, leveraging the robust capabilities of PHP and Laravel framework.. I led the development efforts to build a fully functional e-commerce platform from scratch using PHP and Laravel. This involved creating user-friendly interfaces for browsing products, managing orders, and facilitating secure transactions.

- *Customization and Scalability*
- *Payment Integration*
- *Responsive Design*
- *Performance Optimization.*

**Advocate Imran – Pakistan**

**01/2024 – 02/2024**

**( Advocate-Iron.com ) – MERN Stack Developer (Remote)**

As a MERN Stack Developer for Advocate-Iron.com, I spearheaded the creation of robust web applications utilizing MongoDB, Express.js, React.js, and Node.js technologies. Leveraging these powerful tools, I crafted customized solutions tailored to enhance Advocate-Iron.com's digital presence.

- *Designing and developing scalable web applications to meet Advocate-Iron.com's unique business needs.*
- *Implementing user-centric designs to ensure seamless performance and optimal user experience.*
- *Collaborating remotely with the team to deliver timely updates and foster open communication.*
- *Employing best practices in code optimization and performance tuning to enhance website speed and reliability.*

**Boyd Johnson – Australia**

**10/2023 – 01/2024**

**( Tipanonymous.com ) – Full Stack Developer (Remote)**

As a Remote Full Stack Developer for Tipanonymous.com, I led the development of a fully customized website consisting of 15 pages, utilizing React and Next.js for the front end. Employing React's component-based architecture and Next.js server-side rendering capabilities, I ensured optimal performance and seamless navigation.

On the back end, I implemented a robust server using Node.js, Express, and MongoDB for efficient data management. Through collaborative efforts and meticulous attention to detail, I delivered a comprehensive solution that enhances user engagement and accessibility for Tipanonymous.com.

- *User Experience (UX) Design*
- *Responsive Design*
- *Security Measures*
- *Content Management System (CMS)*
- *Analytics Integration*
- *Regular Maintenance*

**Jassie Diane – USA**

**09/2023 – 10/2023**

**( www.taireglement.fr ) – Laravel Developer ( Remote )**

As a Laravel Developer for [www.taireglement.fr](http://www.taireglement.fr), I took charge of developing the admin dashboard and its entire backend infrastructure. Leveraging Laravel's robust framework, I meticulously crafted a user-friendly and efficient admin interface tailored to meet the specific needs of the platform.

- *My responsibilities included architecting the backend systems, implementing data management functionalities, and ensuring seamless integration with the front-end interface.*
- *By employing best practices in Laravel development, I created a scalable and secure backend environment capable of handling complex administrative tasks with ease.*
- *Furthermore, I incorporated features for user authentication, role-based access control, and data visualization, empowering administrators with the tools they need to manage the platform effectively.*

As a Remote Front-end Developer specializing in Responsiveness, I led design efforts to optimize user experiences across websites and apps. Collaborating closely with the CEO and product team, I streamlined a complex 16-page website, enhancing brand visibility and user loyalty. My focus on crafting responsive designs ensured seamless interactions across various platforms, fostering heightened user satisfaction.

- *I spearheaded the creation of well-crafted digital designs to enable streamlined user experiences across multiple interaction points, enhancing overall user satisfaction*
- *Played a key role in enabling streamlined user experiences across various points of interaction aimed at enhancing user satisfaction through well-crafted digital designs.*

## Additional Experience

**Computer Science Teacher**, One Unit Chowk Science Academy – Bahawalpur, Pakistan | 2021 – 2022

**Web Animations**, GitHub Repository | 2021

**Graphics Design Intern (Remote)**, Digital Business Xpert – Karachi, Pakistan | 2020

**Data Entry and Web Researcher**, Data Robos and Adroit Solutions USA – New York, USA | 2018 – 2020

## Professional Development

**WordPress**, Code's Thinker | 2023

**Full Stack**, Code's Thinker | 2023

**MERN Stack, MEAN Stack**, Code's Thinker | 2023

**ReactJs, VueJs**, Code's Thinker | 2023

**UI/UX Design Course**, Code's Thinker | 2022

**Graphics Design Course**, KPITB | 2021

**Logo Design Course**, Udemy | 2021

**Cyber Security Course**, Udemy | 2021

**Website Animations**, Online Tutorials | 2021

**Introducing Coding for Beginners: an HTML and CSS Course**, BitDegree | 2020

**Critical Thinking Course**, UrCours | 2020

## Projects

**Hostel Management System – Website Development (09/2024):** Using the MERN stack, we developed a Hostel Management System. With React, Vue.js, Node.js, and MongoDB, we created a seamless solution for hostel administration. This system offers intuitive interfaces, dynamic data management, and real-time communication, optimizing hostel operations efficiently.

**Portfolio Website – Website Development (09/2023):** Implemented web methodologies to transform a portfolio website, optimizing user engagement by leveraging intuitive layouts and compelling visuals. Enhanced aesthetics and functionality of a portfolio website through a comprehensive website development, resulting in an immersive and user-centric experience.

**UI/UX Designer, Portfolio Website – Website Development (09/2023):** Implemented UI/UX design methodologies to transform a portfolio website, optimizing user engagement by leveraging intuitive layouts and compelling visuals. Enhanced aesthetics and functionality of a portfolio website through a comprehensive UI/UX design, resulting in an immersive and user-centric experience.

**UI/UX Designer, Muttii Website – Website Development (08/2023):** Managed UI/UX initiatives for Muttii Groups spanning website, app, and tablet platforms, guaranteeing intuitive navigation and seamless user experiences. Developed innovative, user-centric designs to enhance visual appeal and functionality across diverse viewing platforms.

**Ecommerce Website - Website Development, Local University Project (02/2022):** I revolutionized an E-commerce website for our Local University Project. Through meticulous attention to detail and strategic layout planning, I transformed the platform into an immersive and user-centric shopping experience. I optimized user engagement and satisfaction. The result is a visually captivating and intuitively navigable E-commerce website that enhances the overall shopping journey for users.

**Restaurant Management System - Website Development, Local University Project (02/2022):** As developers, I crafted a robust Restaurant Management System (RMS) for our local university project. Leveraging the power of React, PHP, and MySQL, I offers a comprehensive solution for managing restaurant operations efficiently.

**UI/UX Designer, Wash House Website – Front End Development (09/2022):** Transformed laundry service's online presence, boosting customer acquisition through innovative web strategies, while refining front-end elements for enhanced digital branding and market positioning.

## Community Involvement

**Cyber Scout, Cyber Security of Pakistan (2021 – Present):** Facilitate comprehensive cybersecurity training sessions for staff and users, effectively enhancing organizational awareness and reducing human error risks.

**Rescue Scout, Punjab Emergency Service Rescue-1122 (2021 – member):** Collaborate with teams to develop proactive strategies for mitigating risks and safeguarding lives in diverse environments.

**Volunteer Creative Designer, Cyber Security of Pakistan (2021):** Crafted bespoke LinkedIn covers to foster a professional digital presence of initiative. Designed informative awareness posts to educate public about crucial security measures and threats.
